Manufacturer

Description

Personal OBD Handheld Device for flashing directly to the vehicle's ECU.

Includes MV Agusta Motorcycle cable and one micro USB cable.

New Design and Improved Technical Features

- The Powergate 3+ allows you to remotely tune your customer's vehicle by emailing them encrypted files. This allows you to expand your customer base beyond your immediate reach.
- The new PG3+ can be personalized using the supplied Alientech Manager Software. With this interface, you can upload personalized images and icons creating a "private label" appearance. Multi-language format is available.
- Portable, Flexible and Totally Customizable. Expanding your business and your network have never been so easy.
- The PG3+ has been upgraded to include an HD color touchscreen and navigation of the menu becomes effortless due to the bright and colorful icons.
- Thanks to increased memory, it is now possible to store the original file and up to five modified files inside the tool.
- Your PG3+ automatically updates when connected to the Internet guaranteeing the tool has the most up to date vehicle list.
